

Mission-Driven Data Analytics

Powering the missions of federal agencies through federated analytics, transformational mobility, and HyperIntelligence™.

Build your Federal data strategy

With MicroStrategy's powerful platform, you can operationalize all of your data assets and empower employees with decision-making intelligence.

A unified infrastructure to fully leverage federal data at scale MicroStrategy's semantic graph creates a common baseline for every data source across the enterprise. With this strong foundation, agencies can build the connections to their data once, then process and analyze it any way necessary.

Flexibility to use data your way, in any environment

With its open, API-driven architecture, MicroStrategy gives you the flexibility to use the third-party tool you like on top of our unified semantic graph. Avoid vendor lock-in and use the tools of your choice for data visualization, analytics, and more. You can also deploy MicroStrategy's platform-agnostic tools across on-premise and FedRAMP-authorized cloud environments.

Rich features for a wide variety of federal use cases

MicroStrategy's suite of data analytics, visualization, and mobility tools give you everything you need to drive your mission forward. Let insights come to you in zero clicks with HyperIntelligence™, and deliver personalized experiences with identity intelligence.

Federal agencies need their data infrastructure

to do more. The OPEN Government Data Act charges Federal CTOs and CDOs with promoting data-driven decision-making within their organizations. Yet, many struggle to produce the unique, digestible insights decision-makers require.

MicroStrategy can help Federal agencies overcome their most critical challenges:

Siloed data sets prevent a consistent, unified approach across the enterprise.

MicroStrategy can leverage data from all your enterprise assets.

Proprietary technology limits agency deployment options.

MicroStrategy's can support and enhance existing data investments.

Self-service tools generate siloed, single-use metadata.

MicroStrategy provides a unified foundation for all your analytics initiatives.

Security gaps create on-going data governance challenges.

MicroStrategy enforces data security policies throughout your enterprise.

The MicroStrategy Federal Toolkit

With its advanced capabilities, MicroStrategy delivers the scale, flexibility, and security required for federal use cases.

Semantic Graph

Stop reinventing the wheel and start using your data for multiple use cases. MicroStrategy's single, object-oriented metadata layer acts as an information gateway, masking the technical structures of all underlying data sources. Users will see information as a familiar set of attributes, metrics, and other metadata objects—no more searching through siloed data sources for what you really want.

Universal Data Governance Model

All of your data should reflect a single, unified operational picture. MicroStrategy provides a centralized way to enforce data consistency across the enterprise, ensuring that everyone works under the same assumptions.

Granular Security Controls

Centrally manage your data infrastructure at the object level for any data source. Apply role-based access controls (RBAC) to restrict access based on position. Deploy in a FedRAMP Moderate—authorized environment.

Federated Analytics

Leverage your data using MicroStrategy's robust visualization and analytics tools, or use the third-party data visualization and analytics applications you already know and love. MicroStrategy's unified data infrastructure, APIs, and native integrations give you the flexibility to use data your way.

Hybrid Cloud Support

Use the same data tools across the enterprise at any scale, in any environment. MicroStrategy delivers a consistent user experience and toolset across on-premise, public, and private clouds, ensuring a unified approach. Get up and running within 30 minutes with our fully automated deployment and provisioning tools.

Used by innovative federal agencies

Connect with MicroStrategy Federal

MicroStrategy (Nasdaq: MSTR) is a leading worldwide provider of enterprise analytics and mobility software and services. Our mission is to make every enterprise a more Intelligent Enterprise™. MicroStrategy 2019 delivers modern analytics on an open, comprehensive enterprise platform designed to drive business results with federated analytics, transformational mobility, and HyperIntelligence.
