GSA STARS II GWAC

Contract # GS-06F-0787Z

Functional Areas: C1 FA2 and C1 FA3

***Multiple award,
indefinite delivery
indefinite quantity
(IDIQ) contract vehicle***

GSA Contract Holder

8(a) STARS II Program Specifics

The 8(a) STARS II GWAC is designed to promote small business utilization when purchasing information technology (IT) services or IT services-based solutions for the federal government. The 8(a) STARS II program is reserved exclusively for qualifying certified 8(a) small business concerns as the prime contractors per Federal Acquisition Regulation (FAR) 19.8.

The contract offers simple to complex IT service solutions such as:

- IT help-desk support
- Information assurance
- Cyber-security
- Virtualization
- IPv6
- Web 2.0
- And more

The scope of the 8(a) STARS GWAC contracts includes all technology services and associated products necessary to meet the requesting activity's requirements derived from the applicable NAICS definition. The NAICS definition governs the resultant scope of any task orders issued under this contract vehicle. The geographical scope of coverage is worldwide and organization scopes of coverage are those entities authorized in GSA Order ADM 4800.2E.

Delegation Authority

Prior to issuing orders under 8(a) STARS II, federal contracting officers are required to receive training on the use of the 8(a) STARS II contract and be granted a written delegation of procurement authority from the GSA Small Business GWAC Center. Training is offered at no cost via: • Onsite training conferences and events; • Web or video conferences; and • Conference calls. Further information www.gsa.gov/8astars2.

8(a) STARS II Contract Advantages

Using 8(a) STARS II enables federal agencies to access 8(a) firms through an established contract vehicle instead of traditional, open market methods — saving time and taxpayer money.

The 8(a) STARS II enables federal agencies to fulfill their information technology requirements and at the same time meet or exceed socioeconomic goals through the utilization of businesses that are 8(a) certified.

The General Services Administration (GSA) has made it easy for federal customers by providing:

- Pre-competes, easy-to-use contract with stream-lined ordering procedures based on FAR 16.505
- Access to exceptionally qualified, 8(a) small business industry partners
- Shortened procurement lead-time
- Directed task orders up to \$4M
- \$10B program ceiling
- Fixed price, labor hour, and time and material contract terms available
- Five-year base period with one, five-year option
- Transfer of 8(a) credit
- Section 508 Compliance
- Section 803 Compliance
- Dedicated staff that is customer focused and experts in small business technology contracts.

Why Use Cloud Computing Technologies

How can your organization realize the most from its relationship with an external IT resource? One way is to borrow best practices from those that have been utilizing these relationships for years.

As a strategic business tool, IT consulting has been around for over a decade. Cloud Computing Technologies provides multi-year and short term engagements.

Many organizations consider IT consulting, but encounter the challenge of where to start. Cloud Computing Technologies assists with assessing your organization's optimal start point; allowing you to concentrate on your business goals and gains.

Rely on business outcomes as a measure of your external resource IT service partnership. Cloud Computing Technologies understands that measuring progress and achieving your business goal is the bottom line for your organization.

Performance is the hallmark of your experience. Cloud Computing Technologies values the relationships with our clients. Aligning expectations and cultivating each business relationship results in a partnership.

Focus relentlessly on your business objectives. Cloud Computing Technologies provides depth of experience to help you achieve your business's specific needs and goals.

Cost effective Solutions. Cloud Computing Technologies custom tailors solutions to meet your budget and timeframes.
