

# Military Training Solutions

Government agencies continue to face the challenge of doing more with tighter budgets, even as new legislative requirements and directives seek to improve financial, project, and security management. Now more than ever, it is critical to keep employee skills in line with today's advancing technology to ensure your department's goals are met.

## What is Directive 8570?

In August of 2004, the US Department of Defense (DoD) signed Directive 8570, which requires every part-time or full-time military member or defense contractor with privileged access to a DoD information system to carry an approved certification for their job classification. This measure ensures that those performing information assurance (security) measures have the necessary skills and knowledge to protect important information. New hires must obtain appropriate baseline certifications within six months of being assigned to information assurance functions.

## Directive 8570 Compliance Training at New Horizons Central

New Horizons Central can help you achieve Directive 8570 certification requirements. We provide a complete and thorough training solution to help prepare you to pass Directive 8570 certification exams. The table below shows required baseline certifications. The bold denotes certification training available from New Horizons Central.
