Devices Operate at the Speed of Cloud

DEFENSE IN DEPTH

Hypori's multi-layer security posture to protect classified and sensitive data.

Private

Public

- NIAP Security & FIPS 140-2 Encryption in the Cloud
- Multi-Layered Security
- Encrypted Transmission of Pixels Only
- Multi-Factor Authentication Access
- TPM Protected & Security Enhanced Linux in Android
- Sensitive or Classified Data Access From Android, iOS, and Windows

NO DATA ON THE DEVICE

Protecting Organizations & Empowering Users

The growing remote Government, Defense and Intelligence personnel demands easy-to-use, innovative solutions to prevent data loss, liability, and reputational risk due to the increased use of mobile devices.

GOVERNMENT

Enable Government employees with secure access to any commercial or custom application across multiple devices and OS via TLS 1.2.

DEFENSE

Arm service members with data and app access on any personal device instantaneously without exposing security of data.

INTELLIGENCE

Equip personnel with access on any device, personal or GFE, while meeting all security requirements.

FINANCIAL SERVICES

Eliminate security, liability and mission risks through one-way encrypted pixel delivery of data from the cloud to any physical device, guaranteeing no data rest or in transit.

Certified & Compliant

FISMA, HIPAA, NIAP, NSA CSfC, and PCI DSS compliant, and Common Criteria Certified.
